Garden County

DEMOGRAPHICS

Population Estimates

The Census Bureau's current census estimates indicate that Garden County's population decreased from 2,057 in 2010 to 1,930 in 2016, or by -6.2 percent. This compares to a statewide population change of 4.4 percent over the period. The number of people from 25 to 34 years of age increased by 15.8 percent, and the number of people from 55 to 64 years of age increased by 17.9 percent. The white population decreased by 7.8 percent, while the black population increased by 75 percent. The Hispanic population increased from 80 to 106 people between 2010 and 2016 or by 32.5 percent. These data are presented in Table II.35.1.

Table II.35.2, presents the population of Garden County by age and gender from the 2010 Census and 2016 current census estimates. The 2010 Census count showed a total of 1,043 males, who accounted for 50.7 percent of the population, and the remaining 49.3 percent, or 1,014 persons, were female. In 2016, the number of males was 997 persons, and accounted for 51.7 percent of the population, with the remaining 48.3 percent, or 933 persons being female.

Population Migration Trends

Total population change is a combination of births, deaths, and the net migration of those arriving in and leaving the state. The result of births minus deaths is termed the “natural increase.” As calculated from data shown in Table II.35.3, from April 2000 to July 2009, Garden County natural decrease was estimated to be 156 people. Garden County has been experiencing net out-migration, with 397 persons leaving the county in the last nine years.¹⁴⁰ The 2016 population estimates showed a natural decrease of 57 persons. Between 2010 and 2016, Garden County’s population decreased to 1,930 persons.

Table II.35.3	
Population Change	
Garden County	
1980–2010 Census and Intercensal Data	
1980 Population	2,802
Natural Increase 80–90	-44
Net Migration 80–90	-298
1990 Population	2,460
Natural Increase 90–00	-198
Net Migration 90–00	30
2000 Population	2,292
Natural Increase 00–09	-156
Net Migration 00–09	-397
2009 Population Estimate	1,739
2010 Population	2,057
Natural Increase 10–16	-57
Net Migration 10–16	-70
2016 Population Estimate	1,930

The Nebraska Department of Transportation (DOT)’s Department of Motor Vehicles provides another source of information about migration trends. These data represent the net of driver’s license exchanges: licenses issued to new residents of Nebraska and licenses surrendered to other states when Nebraska residents relocate to a new state. Known as the driver’s license exchange data, these records show that the net change in Garden County increased from 20 persons in 2015 to 26 persons in 2016, with an additional net movement of 17 in the first six months of 2017. The driver’s license total exchanges for the last 16 years are presented in Table II.35.4.

Calendar 2016	56	30	26
First Half of 2017	27	10	17

¹⁴⁰ Net migration includes a residual, a change the Census Bureau has not attributed to any cause.

School Age Enrollment

According to the Nebraska Department of Education (DOE), the total number of school-age children in Garden County decreased by 7.3 percent from 327 in 2016 to 303 in 2017, as shown in Table II.35.5. The number of school-age children 5 to 11 years of age decreased from 170 in 2016 to 143 in 2017.

Census Demographic Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Population Characteristics

Table II.35.6, shows population by age for the 2000 and 2010 Census. The population changed by -10.3 percent overall between 2000 and 2010. Various age cohorts changed at different rates. The elderly population, or persons aged 65 or older, changed by 1.8 percent to a total of 560 persons in 2010. Those aged 25 to 34 changed by -0.6 percent, and those aged under 5 changed by 25.3 percent.

Diagram II.35.4, shows real average earnings per job for Garden County from 1990 to 2016. Over this period the average earning per job for Garden County was 31,119 dollars, which was lower than the statewide average of 46,130 dollars over the same period.

Diagram II.35.4
Real Average Earnings Per Job
 Garden County
 BEA Data 1990 - 2016

Diagram II.35.5, shows real per capita income in Garden County from 1990 to 2016, which is calculated by dividing total personal income from all sources by population. Per capita income is a broader measure of wealth than real average earnings per job, which only captures the working population. Over this period the real per capita income for Garden County was 37,136 dollars, which was lower than the statewide average of 40,548 dollars over the same period.

Quarterly Census of Employment and Wages

The Bureau of Labor Statistics (BLS) produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent only filled jobs, whether full or part-time, temporary or permanent, by place of work the pay period. Data from this series are from the period of January 2006 through December 2016 and are presented in Table II.35.28 with the 2016 information considered preliminary. Between 2015 and 2016, total annual employment increased from 558 persons in 2015 to 560 in 2016, a change of (ND) percent.

Nebraska Department of Revenue

According to the Nebraska Department of Revenue (DOR), returns from taxpayers with adjusted gross incomes (AGIs) of less than \$10,000 decreased by 5.4 percent between 2010 and 2016. Returns from taxpayers with AGIs of \$35,001 to \$50,000 decreased by 12.4 percent over the period. On the other hand, by 2016 there were 63 returns for AGIs of \$100,000 or more. Table II.35.31 presents AGI distribution for the years 1991 through 2016.

¹⁴¹ Income levels with fewer than 10 returns were not disclosed, but are included in the totals. As a result, income levels may not sum to total.

Poverty

Poverty is the condition of having insufficient resources or income. In its extreme form, poverty is a lack of basic human needs, such as adequate and healthy food, clothing, housing, water, and health services. According to the Census Bureau’s Small Area Income and Poverty Estimates Program, the number of individuals in poverty decreased from 321 in 2010 to 308 in 2016, with the poverty rate reaching 16.3 percent in 2016. This compared to a state poverty rate of 11.3 percent and a national rate of 14 percent in 2016. Table II.35.32 presents poverty data for the county.

Year	Persons in Poverty	Poverty Rate
2000	325	14.8%
2001	306	14.2%
2002	303	14.1%
2003	270	12.7%

Table II.35.41 shows households by year home built. Housing units built between 2000 and 2009, account for 12.7 percent and those built in 2010 or later accounted for 0.8 percent of households. Households built in the 1970's, 1980's, and 1990's account for 7.7 percent, 7.2 percent, and 6, respectively. Housing units built prior to 1939 represented 30.2 percent of households in 2016.

The disposition of vacant housing units in 2000 and 2010 are shown in Table II.35.43. An estimated 5.1 percent of vacant units were for rent in 2010, a 12.5 percent change since 2000. In addition, some 6.5 percent of vacant units were for sale, a change of -32.4 percent between 2000 and 2010. "Other" vacant units represented 41.4 percent of vacant units in 2010. This is a change of 6.6 percent since 2000. "Other" vacant units are not for sale or rent, or otherwise available to the marketplace. These units may be problematic if concentrated in certain areas, and may create a "blighting" effect.

Department of Property Assessment Division

The Department of Property Assessment Division (PAD) provided a database of residential property transactions over the last 19 years. Property transactions are primarily related to existing buildings, with very few for new construction. During fiscal years 1999 through 2017, there were 571 property transactions in Garden County. Of these, 512 were for single-family homes during this 19-year period, as shown in Table II.35.45.

Table II.35.45

The PAD data also include descriptions of the quality of the building, which refers to the grade of materials and workmanship used in the original construction. Of the 222 single-family home property transactions for units built before 1930, 2.7 percent of units were of low quality and 46.4 percent were of fair quality. Conversely, of the 3 homes built from 2001 through 2010, 0 percent of units were of low quality and 33.3 percent of fair quality. Table II.35.46 provides details on the quality of these single-family residential dwellings by vintage of construction.

Housing Costs

Between 2010 and 2017, the average price of an existing single-family home changed from \$35,300 to \$44,818, a total increase of 27 percent, as shown in Table II.35.48.

Single-family home prices from the PAD database also indicated a general increase in average home prices and average floor area for newer homes. The average home price for single-family homes in Garden County ranged from \$33,538 for homes built before 1930 to \$116,667 for homes built from 2001 to 2010.¹⁴² Homes built from 2001 through 2010 were also larger, averaging 1,723 square feet per unit. Table II.35.49, provides additional details about single-family homes.

Housing Problems

Households are classified as having housing problems if they face overcrowding, incomplete plumbing or kitchen facilities, or cost burdens. Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people

¹⁴² When a manufactured home is placed on a permanent foundation, the Assessor considers the property a single-family dwelling. Hence, these property transactions are seen even though a single-family new construction permit was probably not issued for the manufactured home.

¹⁴³ Price per sq. ft. may not compute precisely due to rounding-off of sales price and floor area.

per room. Households with overcrowding are shown in Table II.35.50. In 2016, an estimated 0.6 percent of households were overcrowded, and an additional 0.6 percent were severely overcrowded.

Table II.35.50 Overcrowding and Severe Overcrowding Garden County 2000 Census SF3 & 2016 Five-Year ACS Data

2016 Five-Year ACS	857	98.8%	5	0.6%	5	0.6%	867

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

There were a total of 6 households with incomplete plumbing facilities in 2016, representing 0.7 percent of households in Garden County. This is compared to 0.8 percent of households lacking complete plumbing facilities in 2000.

Table II.35.51 Households with Incomplete Plumbing Facilities Garden County 2000 Census SF3 & 2016 Five-Year ACS Data

Total Households	1,020	867
Percent Lacking	1.1%	0.3%

Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Garden County, 5 percent of households had a cost burden and 8 percent had a severe cost burden. Some 0.6 percent of renters were cost burdened, and 15.1 percent were severely cost burdened. Owner-occupied households without a mortgage had a cost burden rate of 5.3 percent and a severe cost burden rate of 2.4 percent. Owner occupied households with a mortgage had a cost burden rate of 7.4 percent, and severe cost burden at 11.8 percent.

Housing Problems by Income

Table II.35.54, shows the HUD calculated Median Family Income (MFI) for a family of four for Garden County. As can be seen in 2017 the MFI was \$60,200, which compared to \$68,200 for the State of Nebraska.

Table II.35.55 shows Comprehensive Housing Affordability Strategy (CHAS) data for housing problems by tenure and income. As can be seen there are a total of 59 owner-occupied and 8 renter-occupied households with a cost burden of greater than 30 percent and less than 50 percent. An additional 37 owner-occupied 24 renter-occupied households had a cost burden greater than 50 percent of income. Overall there are 725 households without a housing problem.

Home Mortgage Loans

The FFEIC The Home Mortgage Disclosure Act (HMDA) was enacted by Congress in 1975. Data collected under the HMDA provide a comprehensive portrait of home loan activity, including information pertaining to home purchase loans, home improvement loans, and refinancing. For the analysis only owner-occupied originated loans for single-family units were considered. As can be seen in Table II.35.56, of the 15 loans in 2016, 5 loans were for Home Purchases, 2 were for Home Improvement and 8 were for refinancing.

Table II.35.56 Owner-Occupied Single-Family Home Loans by Loan Type Garden County 2008 – 2016 HMDA Data				
Year	Home Purchase	Home Improvement	Refinancing	Total
2008	7	7	6	20
2009	5	2	8	15
2010	1	2	4	7

Survey of Rental Properties

From September through December of 2017, a telephone survey was conducted with landlords and rental property managers throughout Nebraska. Table II.35.59 presents some basic statistics about the completed surveys from this and other surveys conducted from 2002 through 2017 in Garden County. The number of completed surveys remained unchanged from 4 in 2016 to 4 in 2017. Between 2016 and 2017 the vacancy rate for all units increased by 5.7 percentage points and was at 5.7 percent in 2017.

Table II.35.59 Survey of Rental Properties Garden County 2002–2017 Survey of Rental Properties				
Year	Completed Surveys	Total Units	Vacancy Rate	Absorption Rate
2002	0	0	0	
2003	1	18	0	15
2004	0	0	0	0
2005	2	35	17.1	35.8
2006	3	44	11.4	7.5
2007	5	24	4.2	139.8
2008	5	43	9.3	49.8
2009	4	32	9.4	36.7
2010	5	30	0	47.8
2011	3	29	0	7
2012	7	39	7.7	48.1
2013	3	5	20	
2014	4	52	1.9	
2015	4	33	0	
2016	4	34	0	
2017	4	35	5.7	18.9

Table II.35.60 shows the amount of total and vacant units with their associated vacancy rates. At the time of the survey, there were an estimated 16 single-family units in Garden County, with 2 of them available. This translates into a vacancy rate of 12.5 percent in Garden County, which compares to a single-family vacancy rate of 3.9 percent for the State of Nebraska. There were 19 apartment units reported in the survey, with 0 of them available, which resulted in a vacancy rate of 0 percent. This compares to a statewide vacancy rate of 4.1 percent for apartment units across the state. The average vacancy rate for all unit types over the last five years was 7.1 percent.
