Howard County

DEMOGRAPHICS

Population Estimates

The Census Bureau’s current census estimates indicate that Howard County’s population increased from 6,274 in 2010 to 6,429 in 2016, or by 2.5 percent. This compares to a statewide population change of 4.4 percent over the period. The number of people from 25 to 34 years of age increased by 2.3 percent, and the number of people from 55 to 64 years of age increased by 7.3 percent. The white population increased by 1.9 percent, while the black population increased by 93.3 percent. The Hispanic population increased from 109 to 161 people between 2010 and 2016 or by 47.7 percent. These data are presented in Table II.47.1.

Table II.47.2, presents the population of Howard County by age and gender from the 2010 Census and 2016 current census estimates. The 2010 Census count showed a total of 3,191 males, who accounted for 50.9 percent of the population, and the remaining 49.1 percent, or 3,083 persons, were female. In 2016, the number of males was 3,263 persons, and accounted for 50.8 percent of the population, with the remaining 49.2 percent, or 3,166 persons being female.

 Nebraska DOT Data: 2008 – First Half 2017

Population Migration Trends

Total population change is a combination of births, deaths, and the net migration of those arriving in and leaving the state. The result of births minus deaths is termed the “natural increase.” As calculated from data shown in Table II.47.3, from April 2000 to July 2009, Howard County natural increase was estimated to be 54 people. Howard County has been experiencing net out-migration, with 178 persons leaving the county in the last nine years.¹⁸⁸ The 2016 population estimates showed a natural increase of 104 persons. Between 2010 and 2016, Howard County’s population rose to 6,429 persons.

Table II.47.3	
Population Change	
Howard County	
1980–2010 Census and Intercensal Data	
1980 Population	6,773
Natural Increase 80–90	170
Net Migration 80–90	-888
1990 Population	6,055
Natural Increase 90–00	54
Net Migration 90–00	458
2000 Population	6,567
Natural Increase 00–09	54
Net Migration 00–09	-178
2009 Population Estimate	6,443
2010 Population	6,274
Natural Increase 10–16	104
Net Migration 10–16	51
2016 Population Estimate	6,429

The Nebraska Department of Transportation (DOT)’s Department of Motor Vehicles provides another source of information about migration trends. These data represent the net of driver’s license exchanges: licenses issued to new residents of Nebraska and licenses surrendered to other states when Nebraska residents relocate to a new state. Known as the driver’s license exchange data, these records show that the net change in Howard County increased from -9 persons in 2015 to 10 persons in 2016, with an additional net movement of 2 in the first six months of 2017. The driver’s license total exchanges for the last 16 years are presented in Table II.47.4.

Table II.47.4

Calendar 2016	54	44	10
First Half of 2017	26	24	2

¹⁸⁸ Net migration includes a residual, a change the Census Bureau has not attributed to any cause.

School Age Enrollment

According to the Nebraska Department of Education (DOE), the total number of school-age children in Howard County decreased by 0.3 percent from 1,186 in 2016 to 1,183 in 2017, as shown in Table II.47.5. The number of school-age children 5 to 11 years of age decreased from 600 in 2016 to 574 in 2017.

Census Demographic Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Population Characteristics

Table II.47.6, shows population by age for the 2000 and 2010 Census. The population changed by -4.5 percent overall between 2000 and 2010. Various age cohorts changed at different rates. The elderly population, or persons aged 65 or older, changed by 4.4 percent to a total of 1,175 persons in 2010. Those aged 25 to 34 changed by -10.3 percent, and those aged under 5 changed by -0.3 percent.

Diagram II.47.4, shows real average earnings per job for Howard County from 1990 to 2016. Over this period the average earning per job for Howard County was 31,839 dollars, which was lower than the statewide average of 46,130 dollars over the same period.

Diagram II.47.4
Real Average Earnings Per Job
 Howard County
 BEA Data 1990 - 2016

Diagram II.47.5, shows real per capita income in Howard County from 1990 to 2016, which is calculated by dividing total personal income from all sources by population. Per capita income is a broader measure of wealth than real average earnings per job, which only captures the working population. Over this period the real per capita income for Howard County was 34,276 dollars, which was lower than the statewide average of 40,548 dollars over the same period.

Quarterly Census of Employment and Wages

The Bureau of Labor Statistics (BLS) produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent only filled jobs, whether full or part-time, temporary or permanent, by place of work the pay period. Data from this series are from the period of January 2006 through December 2016 and are presented in Table II.47.28 with the 2016 information considered preliminary. Between 2015 and 2016, total annual employment decreased from 1,622 persons in 2015 to 1,571 in 2016, a change of -3 percent.

The QCEW also reports average weekly wages, which represents total compensation paid during the calendar quarter, regardless of when services were performed. The BLS QCEW data indicated average weekly wages were \$603 in 2015. In 2016, average weekly wages saw an increase of 2 percent over the prior year, rising to 615 dollars, or by 12 dollars. These data are shown in Table II.47.29.

Nebraska Department of Revenue

According to the Nebraska Department of Revenue (DOR), returns from taxpayers with adjusted gross incomes (AGIs) of less than \$10,000 decreased by 4.5 percent between 2010 and 2016. Returns from taxpayers with AGIs of \$35,001 to \$50,000 decreased by 3.6 percent over the period. On the other hand, by 2016 there were 319 returns for AGIs of \$100,000 or more. Table II.47.31 presents AGI distribution for the years 1991 through 2016.

¹⁸⁹ Income levels with fewer than 10 returns were not disclosed, but are included in the totals. As a result, income levels may not sum to total.

Poverty

Poverty is the condition of having insufficient resources or income. In its extreme form, poverty is a lack of basic human needs, such as adequate and healthy food, clothing, housing, water, and health services. According to the Census Bureau’s Small Area Income and Poverty Estimates Program, the number of individuals in poverty increase from 654 in 2010 to 663 in 2016, with the poverty rate reaching 10.5 percent in 2016. This compared to a state poverty rate of 11.3 percent and a national rate of 14 percent in 2016. Table II.47.32 presents poverty data for the county.

Year	Persons in Poverty	Poverty Rate
2000	662	10.3%
2001	710	10.9%
2002	766	11.5%
2003	713	10.6%
2004	682	10.2%
2005	799	12%
2006	757	11.4%
2007	754	11.5%
2008	702	10.8%

Housing Production

The Census Bureau reports building permit authorizations and “per unit”

valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building permit authorizations in Howard County decreased from 30 authorizations in 2015 to 28 in 2016.

The real value of single-family building permits increased from \$159,034 in 2015 to \$194,821 in 2016. This compares to an increase in permit value statewide, with values rising from \$203,629 in 2015 to \$206,586 in 2016. Additional details are given in Table II.47.35.

The disposition of vacant housing units in 2000 and 2010 are shown in Table II.47.43. An estimated 21.8 percent of vacant units were for rent in 2010, a 22.4 percent change since 2000. In addition, some 10.4 percent of vacant units were for sale, a change of 9.7 percent between 2000 and 2010. "Other" vacant units represented 38.3 percent of vacant units in 2010. This is a change of 52.4 percent since 2000. "Other" vacant units are not for sale or rent, or otherwise available to the marketplace. These units may be problematic if concentrated in certain areas, and may create a "blighting" effect.

Department of Property Assessment Division

The Department of Property Assessment Division (PAD) provided a database of residential property transactions over the last 19 years. Property transactions are primarily related to existing buildings, with very few for new construction. During fiscal years 1999 through 2017, there were 1,301 property transactions in Howard County. Of these, 1,262 were for single-family homes during this 19-year period, as shown in Table II.47.45.

Table II.47.45

The PAD data also include descriptions of the quality of the building, which refers to the grade of materials and workmanship used in the original construction. Of the 501 single-family home property transactions for units built before 1930, 1.2 percent of units were of low quality and 31.9 percent were of fair quality. Conversely, of the 57 homes built from 2001 through 2010, 5.3 percent of units were of low quality and 8.8 percent of fair quality. Table II.47.46 provides details on the quality of these single-family residential dwellings by vintage of construction.

Housing Costs

Between 2010 and 2017, the average price of an existing single-family home changed from \$92,416 to \$134,366, a total increase of 45.4 percent, as shown in Table II.47.48.

Single-family home prices from the PAD database also indicated a general increase in average home prices and average floor area for newer homes. The average home price for single-family homes in Howard County ranged from \$53,037 for homes built before 1930 to \$188,057 for homes built from 2001 to 2010, and \$242,345 for the newest homes built between 2011 and 2017.¹⁹⁰ Homes built from 2001 through 2010 were also larger, averaging 1,792 square feet per unit. Table II.47.49, provides additional details about single-family homes.

Housing Problems

Households are classified as having housing problems if they face overcrowding, incomplete plumbing or kitchen facilities, or cost burdens. Overcrowding is defined as having from 1.1 to 1.5

¹⁹⁰ When a manufactured home is placed on a permanent foundation, the Assessor considers the property a single-family dwelling. Hence, these property transactions are seen even though a single-family new construction permit was probably not issued for the manufactured home.

¹⁹¹ Price per sq. ft. may not compute precisely due to rounding-off of sales price and floor area.

people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. Households with overcrowding are shown in Table II.47.50. In 2016, an estimated 0.2 percent of households were overcrowded, and an additional 0 percent were severely overcrowded.

Table II.47.50 Overcrowding and Severe Overcrowding Howard County 2000 Census SF3 & 2016 Five-Year ACS Data

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

There were a total of 1 households with incomplete plumbing facilities in 2016, representing 0 percent of households in Howard County. This is compared to 0.3 percent of households lacking complete plumbing facilities in 2000.

Table II.47.51 Households with Incomplete Plumbing Facilities Howard County 2000 Census SF3 & 2016 Five-Year ACS Data

Total Households	2,546	2,601
Percent Lacking	0.4%	1.8%

Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Howard County, 11.5 percent of households had a cost burden and 9.4 percent had a severe cost burden. Some 14.4 percent of renters were cost burdened, and 17.2 percent were severely cost burdened. Owner-occupied households without a mortgage had a cost burden rate of 4.7 percent and a severe cost burden rate of 2.3 percent. Owner occupied households with a mortgage had a cost burden rate of 15.4 percent, and severe cost burden at 11 percent.

Housing Problems by Income

Table II.47.54, shows the HUD calculated Median Family Income (MFI) for a family of four for Howard County. As can be seen in 2017 the MFI was \$64,000, which compared to \$68,200 for the State of Nebraska.

Table II.47.55 shows Comprehensive Housing Affordability Strategy (CHAS) data for housing problems by tenure and income. As can be seen there are a total of 225 owner-occupied and 109 renter-occupied households with a cost burden of greater than 30 percent and less than 50 percent. An additional 159 owner-occupied 70 renter-occupied households had a cost burden greater than 50 percent of income. Overall there are 1,995 households without a housing problem.

Table II.47.54 Median Family Income Howard County 2000–2017 HUD MFI		
Year	MFI	State of Nebraska MFI

Home Mortgage Loans

The FFEIC The Home Mortgage Disclosure Act (HMDA) was enacted by Congress in 1975. Data collected under the HMDA provide a comprehensive portrait of home loan activity, including information pertaining to home purchase loans, home improvement loans, and refinancing. For the analysis only owner-occupied originated loans for single-family units were considered. As can be seen in Table II.47.56, of the 140 loans in 2016, 56 loans were for Home Purchases, 21 were for Home Improvement and 63 were for refinancing.

Table II.47.56				
Owner-Occupied Single-Family Home Loans by Loan Type				
Howard County				
2008 – 2016 HMDA Data				
Year	Home Purchase	Home Improvement	Refinancing	Total
2008	18	7	41	66
2009	50	8	64	122
2010	37	6	48	91
2011	28	4	63	95

2016	8,464,000	1,636,000	11,621,000	21,721,000

Survey of Rental Properties

From September through December of 2017, a telephone survey was conducted with landlords and rental property managers throughout Nebraska. Table II.47.59 presents some basic statistics about the completed surveys from this and other surveys conducted from 2002 through 2017 in Howard County. The number of completed surveys decreased from 7 in 2016 to 4 in 2017. Between 2016 and 2017 the vacancy rate for all units increased by 3.3 percentage points and was at 4.2 percent in 2017.

Table II.47.59 Survey of Rental Properties Howard County 2002–2017 Survey of Rental Properties				
Year	Completed Surveys	Total Units	Vacancy Rate	Absorption Rate
2002	2	90	4.4	60
2003	3	94	1.1	57.1
2004	3	96	3.1	67.5
2005	6	132	6.8	63.1
2006	4	127	5.5	36.9
2007	3	98	3.1	22.6
2008	6	119	5.9	46.5
2009	8	119	3.4	39.3
2010	8	124	2.4	35.8
2011	7	126	0.8	28
2012	8	123	0.8	31
2013	9	132	4.6	45
2014	10	138	1.4	22
2015	8	139	2.9	34.7
2016	7	225	0.9	7
2017	4	118	4.2	30

Table II.47.60 shows the amount of total and vacant units with their associated vacancy rates. At the time of the survey, there were an estimated 4 single-family units in Howard County, with 0 of them available. This translates into a vacancy rate of 0 percent in Howard County, which compares to a single-family vacancy rate of 3.9 percent for the State of Nebraska. There were 111 apartment units reported in the survey, with 5 of them available, which resulted in a vacancy rate of 4.5 percent. This compares to a statewide vacancy rate of 4.1 percent for apartment units across the state. The average vacancy rate for all unit types over the last five years was 2.8 percent.

Table II.47.60 Rental Vacancy Survey by Type Howard County 2017 Survey of Rental Properties				
Place	Total Units	Vacant Units	Vacancy Rate	5-Year Vacancy Rate Average
Single-Family	4	0	0%	1.2%
