Lancaster County

DEMOGRAPHICS

Population Estimates

The Census Bureau's current census estimates indicate that Lancaster County's population increased from 285,407 in 2010 to 309,637 in 2016, or by 8.5 percent. This compares to a statewide population change of 4.4 percent over the period. The number of people from 25 to 34 years of age decreased by 1.6 percent, and the number of people from 55 to 64 years of age increased by 14.3 percent. The white population increased by 6.3 percent, while the black population increased by 21.3 percent. The Hispanic population increased from 16,685 to 21,198 people between 2010 and 2016 or by 27 percent. These data are presented in Table II.55.1.

Table II.55.2, presents the population of Lancaster County by age and gender from the 2010 Census and 2016 current census estimates. The 2010 Census count showed a total of 143,048 males, who accounted for 50.1 percent of the population, and the remaining 49.9 percent, or 142,359 persons, were female. In 2016, the number of males was 155,107 persons, and accounted for 50.1 percent of the population, with the remaining 49.9 percent, or 154,530 persons being female.

Nebraska DOT Data: 2008 – First Half 2017

Population Migration Trends

Total population change is a combination of births, deaths, and the net migration of those arriving in and leaving the state. The result of births minus deaths is termed the “natural increase.” As calculated from data shown in Table II.55.3, from April 2000 to July 2009, Lancaster County natural increase was estimated to be 21,536 people. Lancaster County has been experiencing net in-migration, with 9,704 persons arriving in the county in the last nine years.²⁹ The 2016 population estimates showed a natural increase of 13,064 persons. Between 2010 and 2016, Lancaster County’s population rose to 309,637 persons.

Table II.55.3	
Population Change	
Lancaster County	
1980–2010 Census and Intercensal Data	
1980 Population	192,884
Natural Increase 80–90	16,935
Net Migration 80–90	3,822
1990 Population	213,641
Natural Increase 90–00	15,308
Net Migration 90–00	21,342
2000 Population	250,291
Natural Increase 00–09	21,536
Net Migration 00–09	9,704
2009 Population Estimate	281,531
2010 Population	285,407
Natural Increase 10–16	13,064
Net Migration 10–16	11,166
2016 Population Estimate	309,637

The Nebraska Department of Transportation (DOT)’s Department of Motor Vehicles provides another source of information about migration trends. These data represent the net of driver’s license exchanges: licenses issued to new residents of Nebraska and licenses surrendered to other states when Nebraska residents relocate to a new state. Known as the driver’s license exchange data, these records show that the net change in Lancaster County increased from 715 persons in 2015 to 1,107 persons in 2016, with an additional net movement of 526 in the first six months of 2017. The driver’s license total exchanges for the last 16 years are presented in Table II.55.4.

Table II.55.4

²⁹ Net migration includes a residual, a change the Census Bureau has not attributed to any cause.

School Age Enrollment

According to the Nebraska Department of Education (DOE), the total number of school-age children in Lancaster County increased by 3.1 percent from 56,916 in 2016 to 58,675 in 2017, as shown in Table II.55.5. The number of school-age children 5 to 11 years of age increased from 30,621 in 2016 to 31,338 in 2017.

Census Demographic Data

In the 1980, 1990, and 2000 decennial censuses, the Census Bureau released several tabulations in addition to the full SF1 100 percent count data including the one-in-six SF3 sample. These additional samples, such as the SF3, asked supplementary questions regarding income and household attributes that were not asked in the 100 percent count. In the 2010 decennial census, the Census Bureau did not collect additional sample data, such as the SF3, and thus many important housing and income concepts are not available in the 2010 Census.

Year	Age Group			Total
	5–11	11–13	14–18	
1992	23,160	5,613	13,855	42,628
1993	23,616	5,824	14,069	43,509

1999	22,935	6,385	15,524	44,844
2000	22,695	6,290	16,025	45,010
2001	23,063	6,287	16,076	45,426
2002	23,107	6,222	16,061	45,390
2003	23,548	6,562	16,113	46,223
2004	23,539	6,442	16,261	46,242
2005	23,631	6,358	16,001	45,990
2006	23,827	6,315	16,024	46,166
2007	24,358	6,382	16,121	46,861
2008	24,888	6,359	16,211	47,458
2009	25,532	6,366	16,243	48,141
2010	26,272	6,312	16,052	48,636
2011	26,937	6,546	16,092	49,575
2012	27,323	7,058	15,963	50,344
2013	27,758	7,305	16,260	51,323
2014	28,214	7,186	16,840	52,240
2015	29,577	7,699	17,570	54,846
2016	30,621	8,131	18,164	56,916
2017	31,338	8,435	18,902	58,675

To study these important concepts the Census Bureau distributes the American Community Survey every year to a sample of the population and quantifies the results as one-, three- and five-year averages. The one-year sample only includes responses from the year the survey was implemented, while the five-year sample includes responses over a five-year period. Since the five-year estimates include more responses, the estimates can be tabulated down to the Census tract level, and considered more robust than the one or three year sample estimates.

Population Characteristics

Table II.55.6, shows population by age for the 2000 and 2010 Census. The population changed by 14 percent overall between 2000 and 2010. Various age cohorts changed at different rates. The elderly population, or persons aged 65 or older, changed by 19.3 percent to a total of 31,101 persons in 2010. Those aged 25 to 34 changed by 15 percent, and those aged under 5 changed by 20.9 percent.

Table II.55.6					
Population by Age

Population by race and ethnicity is shown in Table II.55.8 representing 87.1 percent of the white population in 2010. The black population changed by 40.7 percent, representing 3.5 percent of the population in 2010. The American Indian and Asian populations represented 0.7 and 3.5 percent, respectively, in 2010. As for ethnicity, the Hispanic population changed by 97.8 percent between 2000 and 2010, compared to the 11.1 percent growth rate for non-Hispanics.

Table II.55.27 shows total employment and real personal income for the years of 1969 to 2016. As can be seen in Total Real Personal Income in 2016, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents, and transfer payments, was \$14,083,643,000 a 1.5 percent change between 2015 and 2016. The Table shows further annual data for the years 1969 through 2016. In 2010, total employment was 199,476 and 219,726 in 2016, which was a percentage change of 1.5 over this period.

Diagram II.55.4, shows real average earnings per job for Lancaster County from 1990 to 2016. Over this period the average earning per job for Lancaster County was 44,939 dollars, which was lower than the statewide average of 46,130 dollars over the same period.

Diagram II.55.4
Real Average Earnings Per Job
 Lancaster County
 BEA Data 1990 - 2016

Diagram II.55.5, shows real per capita income in Lancaster County from 1990 to 2016, which is calculated by dividing total personal income from all sources by population. Per capita income is a broader measure of wealth than real average earnings per job, which only captures the working population. Over this period the real per capita income for Lancaster County was 39,755 dollars, which was lower than the statewide average of 40,548 dollars over the same period.

Real Per Capita Income
 Lancaster County
 BEA Data 1990 - 2016

Quarterly Census of Employment and Wages

The Bureau of Labor Statistics (BLS) produces the Quarterly Census of Employment and Wages (QCEW), which reports monthly data on employment and quarterly data on wages and number of business establishments. QCEW employment data represent only filled jobs, whether full or part-time, temporary or permanent, by place of work the pay period. Data from this series are from the period of January 2006 through December 2016 and are presented in Table II.55.28 with the 2016 information considered preliminary. Between 2015 and 2016, total annual employment increased from 166,057 persons in 2015 to 168,525 in 2016, a change of 1 percent.

The QCEW also reports average weekly wages, which represents total compensation paid during the calendar quarter, regardless of when services were performed. The BLS QCEW data indicated average weekly wages were \$806 in 2015. In 2016, average weekly wages saw a increase of 2 percent over the prior year, rising to 822 dollars, or by 16 dollars. These data are shown in Table II.55.29.

Nebraska Department of Revenue

According to the Nebraska Department of Revenue (DOR), returns from taxpayers with adjusted gross incomes (AGIs) of less than \$10,000 decreased by 8.3 percent between 2010 and 2016. Returns from taxpayers with AGIs of \$35,001 to \$50,000 increased by 14.1 percent over the period. On the other hand, by 2016 there were 23,336 returns for AGIs of \$100,000 or more. Table II.55.31 presents AGI distribution for the years 1991 through 2016.

³⁰ Income levels with fewer than 10 returns were not disclosed, but are included in the totals. As a result, income levels may not sum to total.

Poverty

Poverty is the condition of having insufficient resources or income. In its extreme form, poverty is a lack of basic human needs, such as adequate and healthy food, clothing, housing, water, and health services. According to the Census Bureau’s Small Area Income and Poverty Estimates Program, the number of individuals in poverty decreased from 40,409 in 2010 to 35,993 in 2016, with the poverty rate reaching 12.2 percent in 2016. This compared to a state poverty rate of 11.3 percent and a national rate of 14 percent in 2016. Table II.55.32 presents poverty data for the county.

Year	Persons in Poverty	Poverty Rate
2000	20,147	8.3%
2001	21,127	8.6%
2002	23,621	9.4%
2003	23,867	9.5%

Housing Production

The Census Bureau reports building permit authorizations and “per unit” valuation of building permits by county annually. Single-family construction usually represents most residential development in the county. Single-family building

permit authorizations in Lancaster County increased from 1,042 authorizations in 2015 to 1,081 in 2016.

The real value of single-family building permits increased from \$212,364 in 2015 to \$212,884 in 2016. This compares to an increase in permit value statewide, with values rising from \$203,629 in 2015 to \$206,586 in 2016. Additional details are given in Table II.55.35.

The distribution of unit types by race are shown in Table II.55.42. An estimated 71.1 percent of white households occupy single-family homes, while 34.9 percent of black households do. Some 21.7 percent of white households occupy apartments, while 45.7 percent of black households do. An estimated 48.9 percent of Asian, and 42.5 percent of American Indian households occupy single-family homes.

The disposition of vacant housing units in 2000 and 2010 are shown in Table II.55.43. An estimated 47.6 percent of vacant units were for rent in 2010, a 39.1 percent change since 2000. In addition, some 17.1 percent of vacant units were for sale, a change of 69.1 percent between 2000 and 2010. "Other" vacant units represented 22 percent of vacant units in 2010. This is a change of 73.7 percent since 2000. "Other" vacant units are not for sale or rent, or otherwise available to the marketplace. These units may be problematic if concentrated in certain areas, and may create a "blighting" effect.

Department of Property Assessment Division

The Department of Property Assessment Division (PAD) provided a database of residential property transactions over the last 19 years. Property transactions are primarily related to existing buildings, with very few for new construction. During fiscal years 1999 through 2017, there were 78,122 property transactions in Lancaster County. Of these, 74,565 were for single-family homes during this 19-year period, as shown in Table II.55.45.

Table II.55.45

The PAD data also include descriptions of the quality of the building, which refers to the grade of materials and workmanship used in the original construction. Of the 9,811 single-family home property transactions for units built before 1930, 1.3 percent of units were of low quality and 43.3 percent were of fair quality. Conversely, of the 14,424 homes built from 2001 through 2010, 0.1 percent of units were of low quality and 1.8 percent of fair quality. Table II.55.46 provides details on the quality of these single-family residential dwellings by vintage of construction.

Housing Costs

Between 2010 and 2017, the average price of an existing single-family home changed from \$156,359 to \$207,185, a total increase of 32.5 percent, as shown in Table II.55.48.

Single-family home prices from the PAD database also indicated a general increase in average home prices and average floor area for newer homes. The average home price for single-family homes in Lancaster County ranged from \$100,019 for homes built before 1930 to \$203,705 for homes built from 2001 to 2010, and \$270,192 for the newest homes built between 2011 and 2017.³¹ Homes built from 2001 through 2010 were also larger, averaging 1,536 square feet per unit. Table II.55.49, provides additional details about single-family homes.

Average	157,304	1,404	112.03

³¹ When a manufactured home is placed on a permanent foundation, the Assessor considers the property a single-family dwelling. Hence, these property transactions are seen even though a single-family new construction permit was probably not issued for the manufactured home.

³² Price per sq. ft. may not compute precisely due to rounding-off of sales price and floor area.

Housing Problems

Households are classified as having housing problems if they face overcrowding, incomplete plumbing or kitchen facilities, or cost burdens. Overcrowding is defined as having from 1.1 to 1.5 people per room per residence, with severe overcrowding defined as having more than 1.5 people per room. Households with overcrowding are shown in Table II.55.50. In 2016, an estimated 1.3 percent of households were overcrowded, and an additional 0.7 percent were severely overcrowded.

Table II.55.50							
Overcrowding and Severe Overcrowding							
Lancaster County

Incomplete plumbing and kitchen facilities are another indicator of potential housing problems. According to the Census Bureau, a housing unit is classified as lacking complete plumbing facilities when any of the following are not present: piped hot and cold water, a flush toilet, and a bathtub or shower. Likewise, a unit is categorized as deficient when any of the following are missing from the kitchen: a sink with piped hot and cold water, a range or cook top and oven, and a refrigerator.

There were a total of 227 households with incomplete plumbing facilities in 2016, representing 0.2 percent of households in Lancaster County. This is compared to 0.3 percent of households lacking complete plumbing facilities in 2000.

Table II.55.51		
Households with Incomplete Plumbing Facilities		
Lancaster County		
2000 Census SF3 & 2016 Five-Year ACS Data

Cost burden is defined as gross housing costs that range from 30.0 to 50.0 percent of gross household income; severe cost burden is defined as gross housing costs that exceed 50.0 percent of gross household income. For homeowners, gross housing costs include property taxes, insurance, energy payments, water and sewer service, and refuse collection. If the homeowner has a mortgage, the determination also includes principal and interest payments on the mortgage loan. For renters, this figure represents monthly rent and selected electricity and natural gas energy charges.

In Lancaster County, 16.4 percent of households had a cost burden and 12.7 percent had a severe cost burden. Some 24 percent of renters were cost burdened, and 23.4 percent were severely cost burdened. Owner-occupied households without a mortgage had a cost burden rate of 4.6 percent and a severe cost burden rate of 4 percent. Owner occupied households with a mortgage had a cost burden rate of 14.1 percent, and severe cost burden at 5.9 percent.

Housing Problems by Income

Table II.55.54, shows the HUD calculated Median Family Income (MFI) for a family of four for Lancaster County. As can be seen in 2017 the MFI was \$72,000, which compared to \$68,200 for the State of Nebraska.

Table II.55.55 shows Comprehensive Housing Affordability Strategy (CHAS) data for housing problems by tenure and income. As can be seen there are a total of 7,755 owner-occupied and 9,750 renter-occupied households with a cost burden of greater than 30 percent and less than 50 percent. An additional 3,620 owner-occupied and 9,965 renter-occupied households had a cost burden greater than 50 percent of income. Overall there are 81,045 households without a housing problem.

Home Mortgage Loans

The FFEIC The Home Mortgage Disclosure Act (HMDA) was enacted by Congress in 1975. Data collected under the HMDA provide a comprehensive portrait of home loan activity, including information pertaining to home purchase loans, home improvement loans, and refinancing. For the analysis only owner-occupied originated loans for single-family units were considered. As can be seen in Table II.55.56, of the 8,577 loans in 2016, 4,246 loans were for Home Purchases, 683 were for Home Improvement and 3,648 were for refinancing.

Table II.55.56				
Owner-Occupied Single-Family Home Loans by Loan Type

Survey of Rental Properties

From September through December of 2017, a telephone survey was conducted with landlords and rental property managers throughout Nebraska. Table II.55.59 presents some basic statistics about the completed surveys from this and other surveys conducted from 2002 through 2017 in Lancaster County. The number of completed surveys increased from 348 in 2016 to 355 in 2017. Between 2016 and 2017 the vacancy rate for all units increased by 1.1 percentage points and was at 4.5 percent in 2017.

Table II.55.60 shows the amount of total and vacant units with their associated vacancy rates. At the time of the survey, there were an estimated 1,628 single-family units in Lancaster County, with 72 of them available. This

translates into a vacancy rate of 4.4 percent in Lancaster County, which compares to a single-family vacancy rate of 3.9 percent for the State of Nebraska. There were 17,222 apartment units reported in the survey, with 578 of them available, which resulted in a vacancy rate of 3.4 percent. This compares to a statewide vacancy rate of 4.1 percent for apartment units across the state. The average vacancy rate for all units types over the last five years was 3.6 percent.
